TOTAL PLATFORM SOLUTIONS

Allison aggressively provides cradle-to-grave services, including new platform design, platform refurbishment, marine outfitting, platform repair and maintenance, decommissioning, and well plugging and abandonment. Allison's integrated, offshore and land-based support services are custom tailored to its client operators. We are uniquely positioned to provide superlative personnel, ideas, equipment and facilities to carry out an organized plan for your exploration and production activities.

The premier provider of lifecycle services for production platforms in the Gulf of Mexico with a growing presence internationally.

TOTAL PLATFORM SOLUTIONS

"We care about our Customers, we care about our Company, we care about our People and we care about the Environment!"

SAFETY AND SATISFACTION

Allison operates to the very highest safety standards. We approach every project as an opportunity to provide the necessary project management, along with all necessary technical and engineering support required to ensure safe, cost effective solutions to any issues that may emerge. Our philosophy of Incident and Injury Free Operations allows us to make each day at work a time of building relationships and partnering with our employees while at the same time making safety personal, relevant, and important.

The World's Largest Inventory of Offshore Platforms and Production Equipment.

ALLISON CONSTRUCTION GROUP

Allison Construction Group holds an ASME "U" stamp for fabrication and a National Board "R" stamp for repairing and altering pressure vessels.

Our senior management team has over 130 years of combined experience and operates in a Fast, Focused, Flexible and Friendly manor.

ENGINEERING AND PROJECT MANAGEMENT

Allison's engineers, project managers, and support personnel have provided solutions to major energy companies in the Gulf of Mexico and internationally. Our cost effective "fixed price model" for development and decommissioning has been well received worldwide. Through superior project management expertise and a proven track record of safety, Allison has built the industries only "one-stop-shop" model associated with platforms and has created a defensible market position with meaningful competitive advantages. Additionally, management is supported by a deep employee base of highly-experienced and skilled workers giving Allison a proven track record for efficient execution, on-time delivery, safety, quality, reliability, and superior customer service.

ALLISON CONSTRUCTION GROUP

Allison Construction Group's scope includes land and offshore hookup, fabrication, production equipment installation, platform piping, scaffolding, blasting, painting, and maintenance crews. ACG performs platform decommissioning preparation work, cutting, welding, installation of tiedowns and braces for removal. ACG also delivers turnkey solutions to midstream and pipe

line companies. We have an impressive work history with a diverse client base.
